GAMBLING

Methodology: 1,000 interviews were conducted online by YouthSight with undergraduate students from 11-13 August 2017. Students are part of an online panel which is recruited from applicants through UCAS. Quotas were set to reflect the UK student population in terms of gender, course year and university group. Limitations: Participation rates may be higher than those reported from other methodologies (telephone, face-to-face) due to the self-selecting nature of online surveys. Online surveys have been conducted with this group due to their access to technology and the availability of a representative panel via this method and not for telephone or face-to-face interviewing.
