Industry Statistics - May 2020

0 Contents and Preface

Section 1: Primary Statistics

- 1 [Gambling industry overview](#)
- 2 [Operator & Licence numbers](#)
- 3 [Premises](#)
- 4 [Workforce](#)
- 5 [Machines across non remote sectors](#)
- 6 [Arcades \(non-remote\)](#)
 - 6a - [Adult Gaming Centres](#)
 - 6b - [Licensed Family Entertainment Centres](#)
- 7 [Betting \(non-remote\)](#)
 - 7a - [Off Course Betting \(over the counter\)](#)
 - 7b - [On Course Betting](#)
 - 7c - [Pool Betting](#)
 - 7d - [Gaming Machines in betting premises](#)
- 8 [Bingo \(non-remote\)](#)
 - 8a - [Bingo Games](#)
 - 8b - [Gaming Machines in bingo premises](#)
- 9 [Casino \(non-remote\)](#)
 - 9a - [Casino Games](#)
 - 9b - [Gaming Machines in casino premises](#)
- 10 [Lotteries \(non-remote and remote\)](#)
- 11 [Remote Casino, Betting & Bingo \(RCBB\)](#)
 - 11a - [Casino \(remote\)](#)
 - 11b - [Betting \(remote\)](#)
 - 11c - [Bingo \(remote\)](#)
- 12 [The National Lottery \(non-remote and remote\)](#)

Section 2: Other Statistics

- 13 [Gambling Software](#)
-

This Gambling Industry Statistics publication reports on the size and shape of the gambling industry in Great Britain. It provides an overview of Gross Gambling Yield (GGY) by sector, along with the numbers of licensed operators, premises and people employed within the industry.

The report is compiled from data sets submitted to the Gambling Commission by licence holders. These include regulatory returns, society lottery submissions and data sharing arrangements with the National Lottery licence holder.

[Information on how we prepare Industry Statistics and a glossary of terms \(including a detailed explanation of Gross Gambling Yield\) are available on our website.](#)

We use apportionment and estimating to produce these statistics. In this report, we have apportioned 2,299 (48%) of 4,792 regulatory returns and estimated 1,197 (25%).

Due to our use of apportioning and estimating, the latest 12-months of statistics should be considered provisional figures (marked with 'P'). When we receive new data from licence holders, we update our data. Revisions of previously published Gambling Industry Statistics publications are marked with 'R'. We only update data for the last three reporting periods.

For further information

Release Date: 28 May 2020
Next Release: 26 November 2020

Notes on this section:

1. All Remote Casino, Betting & Bingo (RCBB) GGY between April 2008 - October 2014 was data submitted under the Gambling Act 2005 and represents the whole regulated market (regardless of where the customer was based). All RCBB GGY from November 2014 onwards is data under the Gambling (Licensing and Advertising) Act 2014 and relates to Great Britain customers only. Hence, April 2014 - March 2015 is broken down as follows;

Gambling Act 2005 - (April 2014 - October 2014) = £753.53m (spread across remote betting, bingo and casino)

Gambling Act 2014 - (November 2014 - March 2015) = £ 1485.47m (spread across remote betting, bingo and casino)

2. For The National Lottery and Lotteries, figures are a GGY equivalent and relate to the proceeds from ticket sales minus the amount given out in prizes. This includes any GGY equivalent raised through External Lottery Managers. The National Lottery figures include data from Northern Ireland.

3. Sales from operators with Gaming Machine Technical, Trading Rooms Only and Gambling Software licensed activities are not included in this table.

Notes on this section:

1. As of 30 September 2019, there were a total of 2,652 operators licensed by the Gambling Commission, 386 of which operate across more than one sector. Between them, those operators held licences (remote and/or non-remote) that entitled them to conduct 3,641 activities (0.4% decrease on the previous period).
2. Lottery figures prior to 31 March 2011 include operators that held a Converted Lottery/ELM licence which are no longer available.
3. Gaming Machine Technical figures prior to 31 March 2014 include operators that held a Converted GMT licence which are no longer available.

31/03/2019 ^R	10,781	-3%	1,656	8,320	651	154
30/09/2019 ^r	9,745	-10%	1,633	7,315	642	155

Notes on this section:

1. Data is derived from the last regulatory return submitted before the relevant reporting period.
2. Operators who offer bingo as exempt gaming in clubs (including members' clubs, commercial clubs and miners' welfare institutes) and have hit the threshold for high turnover bingo (as defined by Section 275) have been recording the number of licensed premises incorrectly in their regulatory returns, as a consequence the figures are inflated. These operators are required to hold an operating licence, but not a premises licence, if the gaming offered continues to meet the exemptions. We continue to review these returns to rectify errors.
3. From 31 March 2013 onwards, premises data is drawn from regulatory returns. Prior to this, the data was derived from local authority notifications.
4. Casino premises data up to 31 March 2015 was drawn from Casino Drop & Win data returns. After 31 March 2015, casino premises data is drawn from the 'Active' casinos listed by operators within their regulatory returns.
5. Trading Room Only premises are not included.

[Details on gaming machine categorisation are available on our website.](#)

[Details on gaming machine entitlement are available on our website.](#)

Notes on this section:

1. Aggregated Categories relate to operators that did not have in place, mechanisms capable of separating data by category. Over time this has rectified, hence £nil being recorded post March 2017.
2. A change in regulations reducing maximum stakes from £100 to £2 for Category B2 machines took effect in April 2019.
3. In submitting regulatory return information for a machine that offers games that equate to different machine categories, operators are required to submit the number of machines based on the highest category of game available. The GGY however is still broken down by category.

[Details on gaming machine entitlement are available on our website.](#)

Notes on this section:

1. All years above refer to the period April-March unless otherwise stated.
2. From 31 March 2013 onwards, premises data is drawn from regulatory returns. Prior to this, they were derived from local authority notifications.
3. Unlicensed FECs requiring a permit from the local authority are not included in this data.
4. "Aggregated categories" refers to GGY figures that have been provided but not broken down by machine category.
5. In submitting regulatory return information for a machine that offers games that equate to different machine categories, operators are required to submit the number of machines based on the highest category of game available. The GGY however is still broken down by category.

[Details on gaming machine categorisation are available on our website.](#)

[Details on gaming machine entitlement are available on our website.](#)

Notes on this section:

1. Aggregated Categories relate to operators that did not have in place, mechanisms capable of separating data by category. Over time this has rectified, hence £nil being recorded post March 2017.
2. In submitting regulatory return information for a machine that offers games that equate to different machine categories, operators are required to submit the number of machines based on the highest category of game available. The GGY however is still broken down by category.
3. A change in regulations reducing maximum stakes from £100 to £2 for Category B2 machines took effect in April 2019.
4. The figures do not include Turnover from gaming machines in betting premises.

[Details on gaming machine categorisation are available on our website.](#)

[Details on gaming machine entitlement are available on our website.](#)

Notes on this section:

1. Data for machines played through Electronic Bingo Terminals is included.
2. The introduction and widespread use of electronic bingo terminals (EBTs) by a number of operators accounts for much of the increase in category C and category D machines since April 2010 - March 2011. Originally introduced to the market as category D machines, the evidence suggests that a number of the handheld bingo terminals now operate with category C content, resulting in a shift from the lower category to the higher.
3. "Aggregated categories" refers to GGY figures that have been provided but not broken down by machine category.
4. In submitting regulatory return information for a machine that offers games that equate to different machine categories, operators are required to submit the number of machines based on the highest category of game available. The GGY however is still broken down by category.
5. The figures do not include Turnover from gaming machines in bingo premises.

Notes on this section:

1. Figures do not include any income from registration or session fees or prizes relating to peer to peer poker competitions.
2. "Other" includes new games, bonus prize vouchers, lucky bonus prizes and less common games such as Big 6, Pai Gow Tiles and Casino War. After April 2017, Casino Stud Poker was included in 'Other'.
3. Electronic Gaming refers to player positions and not table numbers. Electronic Gaming enables multiple players to participate in the same game of roulette, thus increasing player participation opportunities and reducing overheads.
4. Industry table numbers can fluctuate during the reporting period and as such operators are required to provide average table numbers.

[Details on gaming machine categorisation are available on our website.](#)

[Details on gaming machine entitlement are available on our website.](#)

Notes on this section:

1. In submitting regulatory return information for a machine that offers games that equate to different machine categories, operators are required to submit the number of machines based on the highest category of game available. The GGY however is still broken down by category.

2. The figures do not include Turnover from gaming machines in casino premises.

Notes on this section:

1. Customers gambling on betting exchanges tend to maintain a significant balance in their account as they need to have sufficient funds to cover the liabilities of their bets, rather than just have sufficient funds to cover the stake of the bets they intend to make.
2. Active accounts are those that have been used by customers in the last 12 months. New registrants includes new individual customer registrations that occurred during the period, but may not have gambled.
3. Customers may have accounts with more than one operator and therefore the data relates to accounts rather than the individuals.
4. Betting figures include Pool Betting and Betting Exchange data.
5. Great Britain Only data refers to customers that are based in Great Britain. Non-GB data refers to customers based in other jurisdictions but is acquired in reliance on an operator's Gambling Commission licence.

Notes on this section:

- Customers gambling on betting exchanges tend to maintain a significant balance in their account as they need to have sufficient funds to cover the liabilities of their bets, rather than just have sufficient funds to cover the stake of the bets they intend to make.
- Great Britain Only data refers to customers that are based in Great Britain. Non-GB data refers to customers based in other jurisdictions but is acquired in reliance on an operator's Gambling Commission licence.
